RACKING SYSTEM

Maximize Storage Efficiency
with Our Racking Systems

5 TAHUN
GARANSI

SELECTIVE PALLET RACKING

Selective pallet racking is a commonly used type of racking for pallet-based storage.

This system allows direct access to each pallet without moving others, making stock control easier and optimizing storage space.

Composed of adjustable frames and beams, this racking is ideal for storing large-capacity items in terms of both weight and volume

DOUBLE DEEP PALLET RACKING

5 TAHUN
GARANSI

Double Deep Pallet Racking is similar to Selective Pallet Racking but offers greater depth, providing higher storage capacity.

This system maximizes up to 60% of warehouse storage capacity, although it has more limited access.

It consists of adjustable and movable frames and beams.

LONGSPAN RACKING

5 TAHUN
GARANSI

Longspan Racking is a shelving system designed for storing lightweight to medium-weight items that can be accessed manually.

It simplifies item categorization, retrieval, and stock control.

The system consists of adjustable frames, beams, and shelves made from materials such as plywood or steel plates, depending on the storage needs.

Commonly used for documents, spare parts, cosmetics, medical equipment, and other small items.

DRIVE-IN RACKING SYSTEM

5 TAHUN
GARANSI

The **Drive-in Racking System** is designed for high-density storage using a last in, first out system. Comprising frames and rails to support pallets, it features a single storage direction.

This system optimizes warehouse space usage up to 80% and is ideal for slow-moving products.

MEZZANINE RACKING SYSTEM

5 TAHUN
GARANSI

Mezzanine Racking System digunakan untuk mendapatkan tambahan area penyimpanan pada gudang. Menggunakan struktur tersendiri sehingga mudah di susun serta disesuaikan dengan berbagai jenis tempat. Sistem ini dapat dikombinasikan untuk penyimpanan dengan pallet atau ambalan. Serta dapat digunakan untuk mendapatkan area tambahan yang dapat dipergunakan untuk kantor pada area gudang.

Penggunaan rak mezzanine merupakan solusi ideal untuk memaksimalkan area penyimpanan yang digunakan dengan memanfaatkan ketinggian bangunan gudang.

MULTI-TIERS RACKING SYSTEM

5 TAHUN
GARANSI

Multi-tiers Racking System merupakan solusi penyimpanan dengan memaksimalkan sistem ambalan. Sangat ideal digunakan untuk penyimpanan manual dimana area yang digunakan untuk penyimpanan sangat terbatas. Sistem ini memberikan penyimpanan yang maksimal serta mudah diakses dengan memaksimalkan tinggi ruangan gudang yang ada dengan membuat lantai yang dapat diakses menggunakan tangga atau lift barang.

Biasanya digunakan untuk penyimpanan dengan proses *order-picking*. Sistem sangat cocok digunakan untuk penyimpanan produk atau barang yang memiliki banyak jenis dan tipe. Sistem ini biasanya digunakan untuk penyimpanan dokumen, kosmetik, spare parts, dan barang-barang kecil lainnya.

MOBILE FILE SYSTEM

Fitur-fitur Mobile File System

- Struktur menggunakan tiang dengan setiap level rak dapat menampung beban hingga 70kg.
- Roda base terbuat dari besi solid yang mampu menahan beban hingga 500 kg/bay
- Dilengkapi fitur anti-tilt sehingga mobile file tetap seimbang ketika digerakkan.
- Menggunakan sistem rantai sebagai penggerak dan rel sehingga mampu sampai 12 bay per baris.
- Sistem 1-on-1 base setiap bay sehingga mempermudah penambahan kapasitas bay.
- Sistem penguncian central lock dan kunci pengaman pada tiap baris.

A REVOLUTION IN THE LOGISTICS SYSTEM

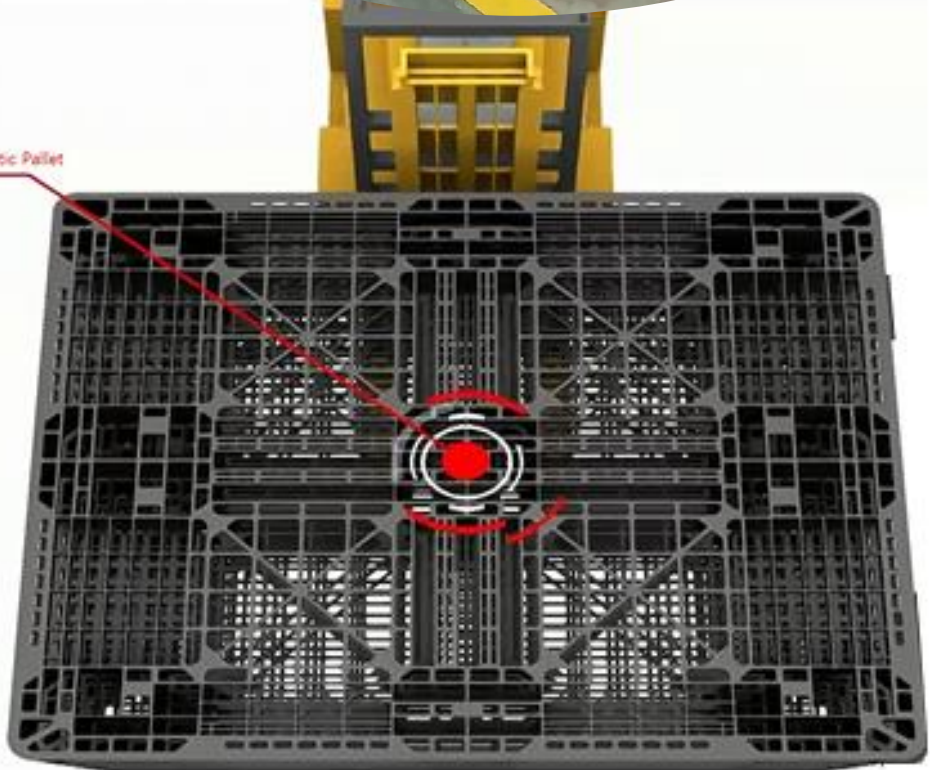

RRPP is an ultralight durable pallet designed on the basis of toxic substance free, complex/commercialized material development and structure analysis through life-cycle process.

RRPP POOL

RRPP Recycled, Reusable Plastic Pallet
RFID ON 091 235

Condition: general condition, used with standard equipment in accordance with ISO 9001:2015. Check the condition of the pallet before use.

RRPP

RECYCLED, REUSABLE PLASTIC PALLET

Specially designed RFID tags with enhanced recognition and durability are inserted into the center of the pallet

Tag Packaging

REID Tag

- ISO-180000 6C C1 G2
- GRAI 96 bits

- RRPP (Recycled Reusable Plastic Pallet) is an eco-friendly recycled plastic pallet used in import and export logistics.
- Based on a global pool system, it can be used multiple times, resulting in cost savings compared to single-use pallets traditionally used in import and export.
- RRPP is equipped with Radio-Frequency Identification (RFID) tags for tracking the movement history of freight.
- It is made from environmentally friendly materials that can be recycled, and its durability is enhanced through patented mold structure design technology.

Carton & Impraboard

Develop and manufacture carton and corrugated box based on customer products.

FABRICATION

Develop and manufacture Logistic containers based on customer products.

We pride ourselves on delivering exceptional transportation solutions tailored to meet your needs.

With a commitment to excellence and a focus on reliability, we stand out as a premier choice in the industry.

On-Time Delivery, Every Time

With meticulous planning and efficient route optimization, we guarantee that your shipments arrive on schedule, every time. Our track record of consistently meeting deadlines speaks volumes about our dedication to customer satisfaction.

Dedicated Drivers with Extensive Experience

We take pride in having our own team of highly skilled and experienced drivers. Our drivers undergo rigorous training and possess in-depth knowledge of the industry, ensuring safe and reliable transport of your goods. With LogisALL, you can trust that your cargo is in capable hands from pickup to delivery.

GPS Tracking for Real-Time Visibility

At the heart of our operations lies cutting-edge GPS tracking technology, ensuring unparalleled visibility and control over your shipments.

With real-time tracking capabilities, you can rest assured knowing the exact location and status of your cargo at any given moment.

Our commitment to transparency and accountability means you're always in the loop, every step of the way.
